1. Run LPPPrintDriver.msi

   Note: (please do not change the default location of installation).

   This installation will copy files in the following folders

   - xdwscRGB.icc in "C:\Windows\System32\spool\drivers\color" folder

   - EC_Prefilter.dll and xdscale.dll   in "C:\Windows\System32\spool\drivers\x64\3

   - driver package in " C:\HPPrintDriver\Driver-Pack_x64_Oct_21_WIC-UI)"

   - folders "HP folder"   and   "C:\HPprintdriver" in C:\   drive

2. Setting up the printer :

   -Go to Control Panel\Hardware and Sound\Devices and Printers   and choose add a
Printer

    - Add a network printer

   -Choose if you have an existing TCP/IP printer that is added or else choose "the printer
   want is not listed" and " add a printer by TCPIP address or host name " and give the IP
   address of the printer

   Refer the list of printers that supports PCL6.
   http://h20331.www2.hp.com/Hpsub/cache/344305-0-0-225-121.html

Uncheck this box

-Now install the printerdriver from folder " C:\HPPrintDriver\Driver-Pack_x64_Oct_21_WIC-UI)"

Browse through the folder and choose file "hpbubidi.inf" from folder

"C:\HPPrintDriver\Driver-Pack_x64_Oct_21_WIC-UI\MasterDriver3_Orig\V3\Release\x64\"

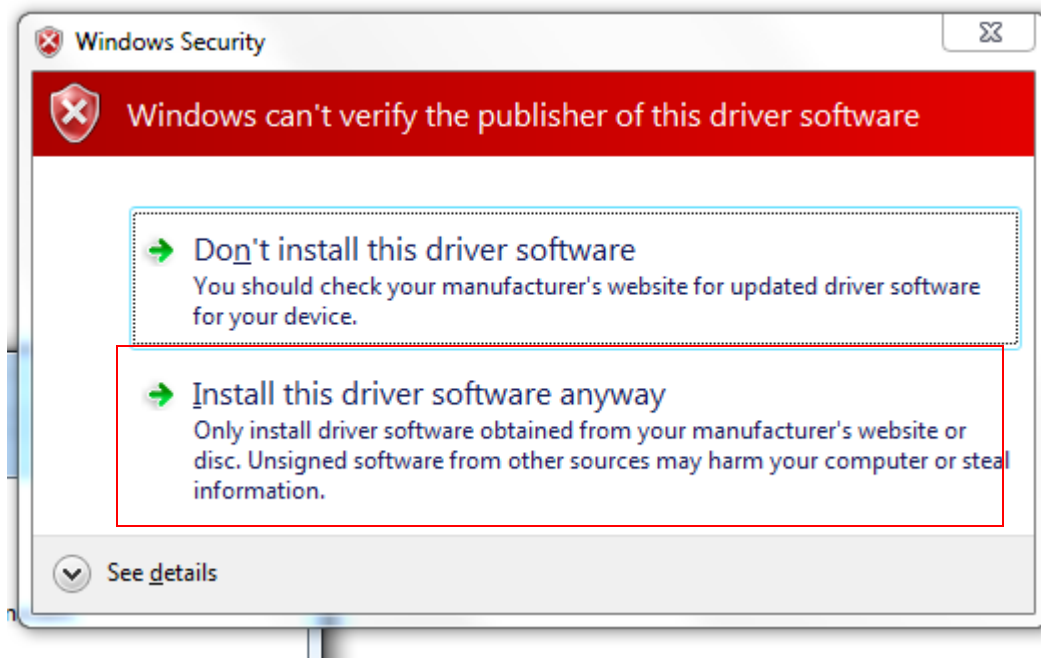

-The next step gives options to choose two printers "master3 for LaserJet (855/ 880) PCL6. Choose any of them and proceed to next and name your printer

-Choose to replace any existing driver if prompted .

There may be several prompts to install the driver as this is not a digitally signed driver.
You can ignore all warnings and install software anyway

3. Please set the local proxy in file proxysettings.txt in folder C:\HP folder\. If this is not set properly, calls to LPP APIs cannot be made successfully

4, Copy the Digimarc license file in folder C:\HPPrintdriver\win32\ . Please contact sibin.koothur@hp.com or bharani.nunna@hp.com for the license file..
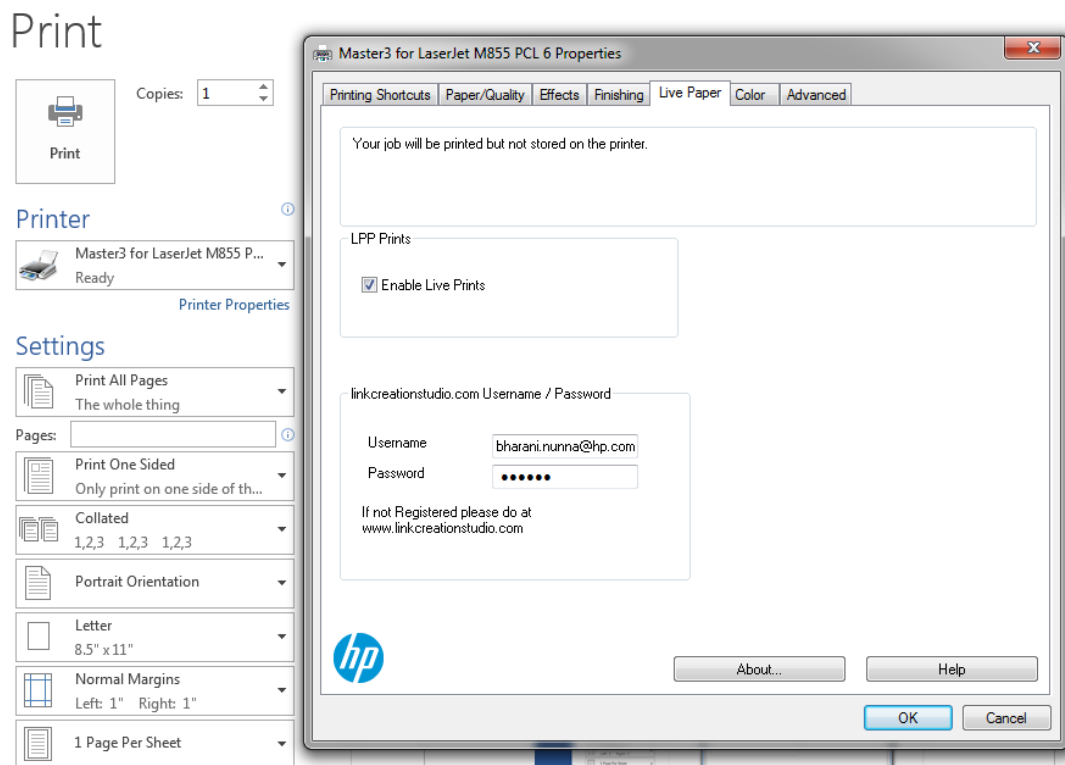

The setup is finished now.

Printing a Document and enabling livepaper:

-Now print any document (Ctrl +P) and choose the printer that is setup in above steps.

-Go to printer properties > Live paper tab and check the box "Enable LivePrints". set your linkcreationstudio.com user credentials in the fields username and password . Ensure you have enough quota to watermarks by checking the remaining links in linkcreationstudio.com

6. Verifying the watermarked images in linkcreationstudio.com

All the images that have been watermarked are reflected in the linkcreationstudio .You can   verify and modify the payoffs of watermakred images by logging in using the credentials that have been specified in the "livepaper" tab in printer properties.

7. A digital equivalent of the file in pdf format will be stored temporarily in folder C:\HPPrintdriver as Outfile.pdf . This is a locally cached watermarked document convereted as pdf file.

8. Instead of printing to paper , print to file can also be done by enabling the option in printer properties.(How to print to file in windows : http://windows.microsoft.com/en-in/windows/print-to-file#1TC=windows-7)

The print prompts for the path to save . The output file will be a .prn file and can be viewed using any prn or PCL6 viewers.
